

Lecture series STRATEGy II (WS2019/2020)

Thursdays, 16:15 -18:00, Building 27, room 2.24, Golm (October 24, 2018 - February 20, 2020)

SPEAKER	TITLE	WORKING GROUP	DATE
Gregory Hoke	Surface processes in the Andes (30-35° S) past, present and future	Climate-tectonic impacts on surface processes	24.10.19
	TBC		05.12.19
Gerold Zeilinger	The use of immersive visualization for geological models	Climate-tectonic impacts on surface processes	12.12.19
Magdalena Scheck-Wenderoth	Geodynamics of sedimentary basins	Basin modeling and georesource formation	19.12.19
Jonathan Weiss	From Turkey to Tucumán: Geodetic and numerical insights into crustal	Interplay between tectonics & inherited crustal inhomogeneities	09.01.20
Philipp Weis	TBC	Metallogenesis of metal deposits and felsic magmas at different crustal levels	30.01.20
Uwe Altnberger	Green elements: chemistry-deposits-economy and ethics.	Metallogenesis of metal deposits an felsic magmas at different crustal levels	06.02.20
Maria Mutti	Basin Filling processes (postponed to 13.02.20)	Basin modeling and georesource formation	13.02.20
Sascha Brune	Geodynamics: Did the South American subduction zone feel the opening of the South Atlantic?	Basin modeling and georesource formation	20.02.20
